Dear Sir/Madam

RE: APPLICATION FOR THE ANDELA KENYA FELLOWSHIP

I have been learning how to code in LakeHub, since I completed my studies in Information Communication Technology at Aviation College from 2015 up to date.  
I have specialized in software development specifically the web applications and have been using ruby on rails in multiple projects.  
I have basic skill in Data Analysis  
I am very interested in this opportunity to help me grow as a developer and analyst, gain experience and skills and also to interact and share ideas with other developers.  
I sincerely look forward to your response. Thank you in advance.

Yours sincerely,  
WAGOLE MUSA
